## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "precursor" and "analogue" render the claims in which they appear indefinite. In the absence of the specific derivatizations to the chemical core claimed or distinct language to describe the structural modifications or the chemical names of the derivatized chemical core claimed of this invention, the identity of the instant analogues and/or precursors would be difficult to describe and the metes and bounds of said analogues and/or precursors applicant regards as the invention cannot be sufficiently determined because they have not been particularly pointed out or distinctly articulated in the claims.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-9, 15 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khanbabaee et al. Tetrahedron (1997), Vol. 53, pages 10725-10732 (Khanbabaee).

Khanbabaee teaches that a mixture of  $\alpha,\beta$ -glucopyranose 11 was allowed to react with the benzylated gallic acid 5 in the presence of DMAP and DCC to afford the  $\beta$ -anomer 9 in 42% yield and the  $\alpha$ -anomer 12 in 33% yield (Scheme 3). The anomers 9 and 12 were easily separated by column chromatography on silica gel. Subsequent debenzoylation of the  $\alpha$ -anomer 12 gave the unnatural  $\alpha$ -acylglycoside 13 and

deprotection of the  $\beta$ -anomer 9 led to the  $\beta$ -configured natural product 10. See Experimental Section.

Khanbabaee differs from the instantly claimed invention in that Khanbabaee teaches refluxing the reaction mixture in DCM versus conducting the reaction at room temperature; however, generally differences in temperature will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such temperature is critical. "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

### ***Conclusion***

7. Claims 1-23 are pending. Claims 1-23 are rejected. No claims are allowed.
